ZANZIBAR NOW!

Zanzibar

Zanzibar is an integral part of the United Republic of Tanzania. It lies 22 miles (35 km) off the coast of the Tanzania mainland and consists of two large islands, Unguja and Pemba, along with more than 50 other islets.

The archipelago experiences high humidity ranging between 73% - 90%, which guarantees pleasant weather all year around, making Zanzibar a good holiday destination with temperatures averaging 20 degrees Celsius in winters and 32 degrees Celsius in summers.

Zanzibar is inhabited chiefly by the ethnic Swahili, Arab, and Indian populations. A fair number of other foreign nationals also reside on the island. Islam is a prominent religion in Zanzibar, and a small Christian minority is also present.

Size	:	2654 SQ. KM
EEZ	:	223,000 square km
Population	:	1.88 mil (2022 PHC) at a Growth Rate of 3.7%
GDP Growth	:	7.4% (2023)
GDP per Capital	:	USD \$1,241 (2023)
Local Time	:	+3 GMT
Official Language	:	Kiswahili

Foreword

Zanzibar stands as a beacon of opportunity, welcoming investors from around the world to explore its vast potential. As the government remains steadfast in its commitment to fostering a dynamic and business-friendly environment, the Zanzibar Investment Promotion Authority (ZIPA) serves as your trusted gateway to unlocking these opportunities.

With a strategic location, a thriving Blue Economy, a burgeoning agribusiness sector, a world-renowned tourism industry, and growing potential in light manufacturing and other key sectors, Zanzibar is poised for transformative investment. This guide highlights the wealth of opportunities available, but beyond these, we remain open to receiving and facilitating innovative investment proposals from forward-thinking investors.

Our government is dedicated to ensuring swift and transparent decision-making, providing investors with the necessary guidance, and streamlining processes to enable seamless entry into Zanzibar's investment landscape. We encourage you to engage with ZIPA for comprehensive technical assistance on procedures and investment facilitation.

Zanzibar is open for business, and we stand ready to welcome you. Together, let us build a prosperous and sustainable future.

SALEH SAAD MOHAMED
THE EXECUTIVE DIRECTOR
ZANZIBAR INVESTMENT PROMOTION AUTHORITY

Opportunities in Health and Pharmaceutical Industry

PROJECT NAME:

DEVELOPMENT AND OPERATION OF FOUR REGIONAL HOSPITALS IN ZANZIBAR

Ministry of Health - Zanzibar

Project Location: Unguja /Pemba

Sector: Health, Medical Equipment

Project Description:

The project involves the development of four regional hospitals in Zanzibar's regions, which currently lack regional health facilities. This is aimed at enhancing healthcare access and quality across the islands.

Project Scope:

- Construction of four regional hospitals.
- Procurement of medical equipment.
- Healthcare staff training programs.
- Operation and maintenance over the concession period.

Project Outcome:

Improved healthcare delivery across underserved regions. Enhanced access to specialized medical services. Economic and employment opportunities through hospital operations.

Project Cost: To be determined.

Status: Concept stage.

PROJECT NAME:

SPECIALITY AND TERTIARY CARE HOSPITAL IN ZANZIBAR

Ministry of Health - Zanzibar

Project Location: Unguja /Pemba

Sector: Health, Medical Equipment

Project Description:

This project aims to establish a world-class speciality and tertiary care hospital in Zanzibar through a Public-Private Partnership (PPP). The hospital will address the existing gap in providing advanced medical treatments locally, reduce the need for patients to seek treatment abroad and position Zanzibar as a regional hub for medical tourism.

Project Scope:

- **Specialty Services:** Focus on advanced medical procedures in cardiology, oncology, neurology, orthopedics, and pediatrics.
- **Training and Capacity Building:** Continuous training programs for local healthcare workers.
- **Technology and Equipment:** State-of-the-art medical technology and infrastructure.
- **Medical Tourism:** Attracting patients from the region and beyond.
- **Research and Development:** Establishing a research wing to contribute to medical advancements.

Project Outcome:

- Improved quality and accessibility of healthcare services in Zanzibar.
- Significant cost savings for the government by reducing overseas medical referrals.
- Enhanced skills and expertise among local healthcare professionals.
- Increased job opportunities and economic activity through medical tourism.
- Long-term sustainability of healthcare services.

Project Cost: To be determined.

Status: Concept stage.

PROJECT NAME:

ESTABLISHMENT OF ZANZIBAR ALBINISM CENTER: A SAFE SPACE FOR HEALTH, RIGHTS OF PEOPLE WITH ALBINISM

Zanzibar Albinism Health Organization (ZAHO)

Project Location: Unguja/Pemba

Sector: Health

Project Description:

Persons with albinism in Zanzibar face numerous challenges, including limited access to specialized healthcare, widespread social stigma, and a lack of inclusive support services. Since its establishment in 2021, ZAHO has been committed to advancing the rights, health, and dignity of persons with albinism through advocacy, awareness, and support. However, the lack of a permanent, dedicated facility limits the organization's ability to scale its impact. The proposed Zanzibar Albinism Center seeks to provide a centralized hub for clinical services, counseling, education, and organizational coordination. Establishing a health center dedicated to individuals with albinism in Zanzibar is not only a medical necessity but also a step towards social justice and inclusion. By addressing their unique health challenges and combating stigma, such an initiative can empower the albinism community and set a precedent for similar efforts across Zanzibar.

Project Cost: Estimated Amount of Investment Required (TZS) 1,500,000,000.

Status: Master Plan Ready.

Blue Economy & Fisheries

Website
www.zipa.go.tz

PROJECT NAME:

CONSTRUCTION OF FISH LANDING SITES AND ASSOCIATED FACILITIES IN ZANZIBAR

Ministry of Blue Economy and Fisheries

Project Location: Unguja /Pemba

Sector: Blue Economy and Fisheries

Project Description:

The objective of the project is to construct two landing sites and their associated facilities for small scale fisheries in order to provide safe, hygienic and efficient work environment for fishers and related players in the fisheries value chain. Currently there are around 232 landing sites scattered around the two islands of Zanzibar. The sites are characterized by accessibility difficulties, lack of hygiene infrastructure, storage facilities and ice production plants. Furthermore, the ad hoc nature of some of the sites has resulted into lack of proper management and development.

Project Cost:

Estimated Investment Amount Required (US\$)
10,225,000.

PROJECT NAME:

DEEP SEA FISHING

Zanzibar Fisheries Company (ZAFICO)

Project Location: Unguja /Pemba

Sector: Blue Economy and Fisheries

Project Description:

Zanzibar Fisheries Company (ZAFICO) is a government company under the ministry of blue economy and fisheries established for the purpose of dealing with all matters concerning with fisheries including deep sea fishing.

The company was established since 2017 for the purpose of transforming the fisheries sector from local home usage to the business sector which may create an employment opportunity and reduce the poverty in the community. This objective strategically reached through Deep Sea Fishing where company purchased a long line fishing boat with 18-meter-long and has a capacity of 38 tons. Currently, the company has two long line fishing boat for the deep[1]sea fishing that can spend 12 to 14 days in the deep sea to catch Tuna and tuna like species.

This fishing type is new model for Zanzibar where most of Zanzibaris are not aware with. This situation led to a number of challenges during the implementation. Some of them are:

- Lack of expertise in the field.
- In sufficient technology for fish catching, handling and storage.
- Improper knowledge and equipment.
- There is no value chain which guarantee the value addition of the product.
- Lack of guaranteed market for all catching.

Project Cost: Estimated Investment Amount Required (US\$) 7,000,000.

Status: Concept stage.

PROJECT NAME:

REHABILITATION OF MALINDI COLD ROOMS, FISH PROCESSING & ICE MANUFACTURING

Zanzibar Fisheries Company Limited (ZAFICO)

Project Location: Unguja

Sector: Blue Economy and Fisheries

Project Description:

This project involves the rehabilitation, renovation, financing, operation and maintenance of the old ZAFICO plant. The facility includes cold rooms, ice manufacturing plant and fish processing units. The Government is concurrently rehabilitating the adjacent wharf, a hub for fishing vessels under 45m for catch ofloading, fuelling and other amenities.

Strategic Alignment

Supports modernization of Zanzibar's fisheries value chain and cold chain infrastructure, contributing to food security, export growth and local employment under national blue economy priorities.

Project Components

- Cold rooms
- Ice plant
- Fish processing facility
- Wharf rehabilitation (Government-led)
- Support facilities for fishing vessels

Partnership Modality

Private partner to rehabilitate, finance, operate and maintain (RFOM) the cold chain and processing infrastructure. Government responsible for wharf rehabilitation. TADB Bank has indicated willingness to provide concessional loans for this cold chain project.

Status: Feasibility study available.

Project Cost: Estimated Amount Investment Required (US\$) 15,000,000.

Investment Authority:

Zanzibar Investment Promotion Authority (ZIPA), Zanzibar.

PROJECT NAME:

MANAGEMENT, OPERATION & MAINTENANCE OF DRY ANCHOVY PROCESSING AND VALUE ADDITION

Zanzibar Fisheries Company Limited (ZAFICO)

Project Location: Unguja/Kama

Sector: Blue Economy and Fisheries

Project Description:

A state-of-the-art dry anchovy processing and value addition project with new Government-built infrastructure. The private partner will install/ procure machinery for value addition processes. The project includes drying racks, solar dryers, washing, steaming, loading/offloading, weighing, business center, rental accommodations, chemical building, fish meal plant with machinery, warehouses and factory buildings.

Strategic Alignment

Unique in East Africa, this facility aims to boost small pelagic fish value addition, increase export readiness and generate employment and entrepreneurship opportunities.

Project Components

- Drying area with racks and solar dryers
- Processing buildings (washing, steaming, loading, weighing)
- Fish meal plant & machinery
- Warehouses and factory buildings
- Business centre & rental accommodations
- Public facilities

Partnership Modality

Private partner responsible for Procuring value addition machinery, managing, operating, and maintaining (O&M + Procurement of Machineries) the Facility. Government has developed core infrastructure.

Status: Feasibility study available.

Project Cost: Estimated Amount Investment Required (US\$) 8,000,000.

Investment Opportunity

Be part of pioneering anchovy value addition in the region, leveraging existing infrastructure with room for technological upgrades and business expansion.

Investment Authority:

Zanzibar Investment Promotion Authority (ZIPA), Zanzibar.

Email: info@zipa.go.tz

PROJECT NAME:

FISH PROCESSING AND LANDING SITE AT FUNGUREFU

Zanzibar Fisheries Company Limited (ZAFICO)

Project Location: Unguja/Fungurefu

Sector: Blue Economy and Fisheries

Project Description:

Development of a landing site with jetty for fishing vessels to ofload catch, accompanied by a fish processing factory. Government is procuring a 39.9m deepsea fishing vessel and constructing factory facilities. Private partner to equip modern fish processing machinery, expand project components including cold chain systems and manage operations.

Strategic Alignment

Strengthens Zanzibar's fishing industry by integrating deep sea fishing capacity with modern processing and export-ready infrastructure, advancing blue economy objectives.

Project Components

- Landing site with jetty
- Fish processing factory
- Deepsea fishing vessel (39.9m)
- Cold chain systems and expansion facilities

Partnership Modality

Government leads vessel procurement and facility construction, private partner to finance equipment, expand, operate, manage and maintain processing, Deepsea vessel and landing site operations.

Status: Feasibility study available.

Project Cost: Estimated Amount Investment Required (US\$) 5,000,000.

Investment Opportunity

Invest in integrated fishing and processing infrastructure with direct access to deep sea catch and export markets.

PROJECT NAME:

OCTOPUS AND FISH PROCESSING PLANT AT SHUMBA MJINI

Zanzibar Fisheries Company Limited (ZAFICO)

Project Location: Unguja/Shumba Mjini

Sector: Blue Economy and Fisheries

Project Description:

This is a greenfield project for the design, construction, financing, operation and maintenance of a modern octopus and fish processing plant. Shumba Mjini is renowned as one of Zanzibar's richest octopus habitats, producing premium - quality species with high market value locally and internationally. The area benefits from community - managed "octopus closure zones" where fishing is temporarily prohibited, allowing stocks to regenerate. Once the harvest period opens, yields are exceptionally high in both quantity and quality. These same areas also produce abundant fish stocks under similar sustainable management.

Strategic Alignment

This project supports diversification and value addition in Zanzibar's fisheries sector, targeting high-value species for both domestic and export markets, while promoting sustainable fishing practices that protect marine biodiversity and enhance long-term yields.

Project Components

- Modern octopus and fish processing plant facilities
- Cold storage and packaging systems
- Supporting infrastructure and utilities
- Sustainable harvesting and supply chain systems

Partnership Modality

Be the first to establish a high-value octopus processing hub at the source of one of East Africa's richest and best-managed octopus fisheries. With secure access to premium quality catch, sustainable harvesting systems and strong Government and community support, this project offers significant returns for export and specialty seafood markets.

Investment Authority:

Zanzibar Investment Promotion Authority (ZIPA), Zanzibar.

Email: info@zipa.go.tz

Contact:

Executive Director,
Zanzibar Investment Promotion Authority (ZIPA), Zanzibar

Status: Concept stage.

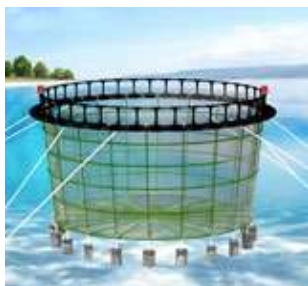

Project Cost: Estimated Amount Investment Required (US\$) 10,000,000.

Investment Opportunity

Be the first to establish a high-value octopus processing hub at the source of one of East Africa's richest and best-managed octopus fisheries. With secure access to premium quality catch, sustainable harvesting systems and strong Government and community support, this project offers significant returns for export and specialty seafood markets.

PROJECT NAME:

FISH CAGE FARMING (AQUACULTURE)

Zanzibar Fisheries Company Limited (ZAFICO)

Project Location: Bwereo - Unguja

Sector: Blue Economy and Fisheries

Project Description:

This is a greenfield project for the design, construction, This is a greenfield aquaculture project for the design, financing, construction, operation, and maintenance of modern fish cage farming systems. The Government will provide both shore and offshore areas that are naturally suited for cage farming, ensuring optimal water quality, stable conditions and high productivity potential.

Strategic Alignment

This project directly supports Zanzibar's aquaculture development policy by;

- Enhancing sustainable fish production
- Diversifying fish supply sources
- Creating stable livelihoods for local communities
- Reducing fishing pressure on wild stocks while meeting growing seafood demand

Project Components

- Fish cages located in offshore waters and shore-based support facilities
- Infrastructure for feeding, harvesting and monitoring
- Cold chain and packaging systems for market-ready products
- Training and technology transfer to local workforce

Partnership Modality

Private partner responsible for the full project lifecycle (DBFOM). Government to provide land (shore and offshore) and facilitation for licenses, environmental approvals and operational support.

Status: Feasibility study available.

Project Cost: Estimated Amount Investment Required (US\$) 8,000,000.

Investment Opportunity

Capitalize on the growing global and regional demand for farmed fish through access to premium aquaculture sites in one of Zanzibar's most sought-after coastal locations. Proximity to Nungwi's tourism hub creates opportunities for premium seafood branding, direct-to-market sales and synergy with the hospitality industry.

PROJECT NAME:

SHRIMP FARMING AT PEMBA

Zanzibar Fisheries Company Limited (ZAFICO)

Project Location: Kiungoni - Pemba

Sector: Blue Economy and Fisheries

Project Description:

A greenfield shrimp farming initiative involving the design, financing, construction, operation and maintenance of both onshore and offshore shrimp farms. The Government has allocated highly suitable coastal and marine areas in Pemba recognized as one of East Africa's prime shrimp habitats where wild shrimp thrive in abundance and exceptional quality. These waters are naturally conducive to shrimp aquaculture, reducing operational risk and enhancing production yields.

Strategic Alignment

- Expands Zanzibar's aquaculture portfolio with a high-value, export-oriented product
- Leverages Pemba's unique environmental conditions and naturally rich shrimp populations
- Supports economic growth through job creation, foreign exchange earnings and skills transfer
- Aligns with Zanzibar's blue economy strategy for sustainable marine resource utilization

Project Components

- Onshore shrimp farming ponds and associated infrastructure
- Offshore shrimp cages or enclosures
- Hatcheries for seed production
- Feed production facilities
- Processing and cold chain systems for domestic and export markets

Partnership Modality

Private partner responsible for the Full project lifecycle (DBFOM), from hatchery to export. Government to provide land (shore and offshore) plus facilitation for licenses, infrastructure linkages and regulatory approvals.

Status: Feasibility study available.

Project Cost: Estimated Amount Investment Required (US\$) 4,000,000.

Investment Opportunity

Be among the first to establish large-scale shrimp aquaculture in East Africa's most naturally advantageous shrimp habitat. With government support, abundant natural stock and ideal environmental conditions, investors can position themselves for strong returns in both regional and global premium shrimp markets.

Energy, Oil and Gas Development

Website
www.zipa.go.tz

PROJECT NAME:

SUPPLY AND DISTRIBUTION OF LPG IN ZANZIBAR

Ministry of Blue Economy and Fisheries

Project Location: Unguja

Sector: Oil and Gas Sub-Sector

Project Description:

The country need to have a reliable and affordable gas supply that can be used for different purposes including electricity generation, household uses and other industrial sectors, currently Zanzibar is facing lack of those infrastructures to support Gas business. With the rising demand of gas in Zanzibar that can be used for different purpose, the issue of having a reliable and affordable supply is of the essence. As population growth, coupled with economic and social development continues to increase Zanzibar's energy requirements and heighten the need for greater environmental protection, we are convinced that LPG is an ideal solution.

Market Size

- Local Market - Market offtake of industrial park serviced land is at 20% annually and this increases at a 7% annually.
- Current East African - Zanzibar stands to benefit from this regional growth in demand by exporting products to the region. Targeting up to 20% of the EAC market and 5% the African Market.
- Tax Incentives for Industrial - Exemption from payment of corporate tax for an initial period of ten years.
- Park Development - Exemption from payment of withholding tax on rent, dividends and interest for the first ten years.
- Cooperate tax for an initial period of ten years.
- Exemption from payment of withholding tax on rent, dividends and interest for the first ten years.
- Exemption from payment of property tax for the first ten years.

Project Cost:

Estimated Investment Amount Required (US\$) 6,900,000.

Status: Concept stage.

PROJECT NAME:

CONSTRUCTION OF LPG DEPOT OF MINIMUM CAPACITY OF 1,500MT AT MANGAPWANI ZANZIBAR

Zanzibar Petroleum Development Company Ltd. (ZPDC)

Project Location: Unguja

Sector: Blue Economy - Oil and Gas
Sub-Sector

Project Description:

The country need to have a reliable and affordable gas supply that can be used for different purposes including electricity generation, household uses and other industrial sectors, currently Zanzibar is facing lack of those infrastructures to support Gas business. With the rising demand of gas in Zanzibar that can be used for different purpose, the issue of having a reliable and affordable supply is of the essence. As population growth, coupled with economic and social development continues to increase Zanzibar’s energy requirements and heighten the need for greater environmental protection, we are convinced that LPG is an ideal solution.

Project Cost:

Estimated Investment Amount Required (US\$) 6,900,000.

PROJECT NAME:

DEVELOP STORAGE FACILITIES AND SUPPLY OF REFINED PETROLEUM PRODUCT AT MWANGAPWANI ZANZIBAR

Zanzibar Petroleum Development Company Ltd. (ZPDC)

Project Location: Unguja

Sector: Blue Economy - Oil and Gas Sub-Sector

Project Description:

The Revolutionary Government of Zanzibar (RGoZ) has identified Mangapwani area as key strategic location for Oil and Gas projects and to implement Petroleum Bulk Procurement project is inviting private partners to Design, Finance and construct such infrastructures. To construct, operate and maintain a depot of minimum capacity of 50,000MT which will meet demand of the petroleum products for Unguja and Pemba Islands, currently the total storage capacity is 13,136 MT for Unguja Island and 1,570MT for Pemba Island.

Zanzibar's monthly petroleum product consumption stands at 22,000,000 liters to 24,000,000 liters at maximum. Monthly petroleum consumption grow by average rate of 11%. There also need to keep strategic petroleum reserve (SPR) for at least 3 months consumption (70,000,000 liters).

Therefore Country need to construct, operate and maintain a depot of minimum capacity of 50,000MT which will meet demand of the petroleum products for Unguja and Pemba Islands for a minimum of 3 months.

PROJECT NAME:

ENHANCING HORTICULTURAL PRODUCTION AND PRODUCTIVITIES THROUGH DIRECT EMPOWERMENT OF WOMEN AND YOUTH GROUPS

Ministry of Agriculture, Irrigation, Natural Resources and Livestock
Project Location: Unguja/Pemba
Sector: Agriculture

Project Description:

Zanzibar's fruit, spice, and vegetable production has a history dating back to before the 19th century, reliant on small to medium-sized enterprises. Horticulture is vulnerable to climate change due to its dependence on water and favorable weather conditions, which include changing rainfall patterns and temperatures.

This initiative seeks to boost horticultural production to meet local and export market demands by addressing challenges such as drilling boreholes, developing drip irrigation systems, and improving agri-business infrastructure and facilities.

- Support women and youth groups in horticultural activities through organization and capacity building.
- Develop farm plots for women and youth to practice horticulture.
- Enhance agribusiness infrastructure and reduce post-harvest losses through improved techniques.
